

Interior primers

2026/1

Surface preparation

Ensures better paint adhesion to the surface, increases durability, and provides additional protection for the surface being painted.

Flügger Sealer Non-drip

Non-drip, acrylic water-based primer

- Excellent penetration into the substrate
- For absorbent and highly absorbent surfaces
- Product with a neutral odor

Technical parameters:

- Spreading rate: 7*/5** m²/l

Flügger Wall Primer Perform

Opaque, white primer that produces a matt surface

- Available in the colouring system in Base 1
- Produces a uniform surface prior to additional treatment
- Developed for surface preparation before painting with Perform series paints or wallpapering

Technical parameters:

- Spreading rate: 6 m²/l

Flügger Wall Primer PRO

Alkali resistant extra rich priming paint that produces a matt surface

- Available in the colouring system in Base 1 and Base 4
- Ensures a uniform, saturated and filled substrate
- Primarily developed for preparing surfaces before painting with PRO series paints

Technical parameters:

- Spreading rate: 8 m²/l

Flügger H₂O wet room system

Flügger Wall Primer H₂O

Primer and intermediate special primer for surfaces in wet room

- For surfaces where changing moisture and water conditions occur
- Included in Flügger H₂O wet room system
- Slightly blue toned for traceability

Technical parameters:

- Spreading rate: 6 m²/l
